

Dear Rick,

I'm sorry to hear about the trouble with the fax transmittal yesterday. I fear our fax machine may also be to blame, as it has the nasty habit of stopping the transmission on the second to last page. I noticed that this happened yesterday, but the very last page was the continuation of the article entitled "Electron Reproaches Masters' Champion Faldo Golf Video" which spoke of business decisions which are of no consequence to your invention. Unfortunately, I did not keep the faxed papers in order, so the only way for me to tell if you are missing any articles is if you tell me the titles of the articles you did receive. On the fax cover letter I wrote the number of pages to be transmitted, so you could check to see how many did not go through.

We have many back issues of Home Video Enthusiast and Video Marketing News on file here at Phillips, and it would be practically impossible for me to pull out every article that may be of interest to you. I pulled out all of the articles on golf and other sports instructional videos, but there may be some other articles on general marketing information that may be of interest to you. If you ever find yourself in the Washington, DC area, I believe it would be possible for you to come in and look through our past issues to see if there is anything that could help you. We also publish other newsletters entitled Future Home Technology and Video Technology News which may also contain articles of interest to you, although I could not guess what. I only have a few days of work left in the summer, and if there is any other specific topic you would like me to research for you, I would be glad to help if I could. In the meantime if you would like a subscription to any of our newsletters, please let me know.

I will be attending Yale University for the next four years, and I can be reached at the following address all four years, though my phone number will change yearly.

Margaret Mooney
P.O. Box 1511

I will be returning to work at Phillips with WGN during my Christmas break this year, probably beginning the week of the Dec. 30th. If you need any more help at that time or would like hear if there have been any other pertinent developments, I would be glad to help you if I could. Your invention sounds extremely interesting and it would be fascinating to follow the progress of your product. I understand that you are under a nondisclosure agreement, and I appreciate what you were able to tell me as it will help us understand better what type of information is applicable to your invention. I can assure you that we will not do anything to violate your nondisclosure agreement.

I have enjoyed helping you this summer, as my position as research assistant to the editors of our newsletters has given me the time to help you out, as I do not have to meet weekly deadlines. This has also been one of my few assignments with a personal touch to it. I wish you the best of luck and perhaps will have more contact in the future. If I can do anything else to help

before I go, please let us know. Take care.

Sincerely,

Margaret Mooney
